Abdullah Ragab

AI & Full-Stack Software Engineer

abud@abud.fun · LinkedIn · GitHub · abud.tech

Profile

Product engineer and software team leader. Build web and mobile applications, business systems, developer tools, and AI integrations. Work across requirements, interface design, implementation, testing, and deployment.

Experience

Software Team Leader · ORBIQ Technologies
2026–Present
Develop and test solutions and prototypes for Swaya, an educational product in development that uses AI and voice interaction.

Founder & Lead Product Engineer · ABUD TECH
Independent practice
Lead independent delivery of apps, business systems, and developer tools, from client discovery and interface design to testing and deployment.

Contract Software Engineer & Digital Solutions Consultant · ELHABAK Engineering Consultancy
2026
Designed and developed the public website and an operations system for engineering projects, documents, and permissions. Contributed to testing and VPS deployment.

Internship & Professional Training · FlyRank AI
2026
Built a machine-learning pipeline for content opportunity scoring and redesigned the project creation flow for SoloFlow AI.

Selected projects

- **MohamyPhone** · Cases, hearings, and clients on Android.
- **Nuvora ERP** · Sales, inventory, and accounting in one system.
- **ELHABAK** · An engineering firm’s public site and operations system.
- **RootRay** · Point at a UI element and find its source.

Core skills

TypeScript · React · Next.js · Node.js · PostgreSQL · Python · AI Integration · System Design · Product Engineering · Technical Leadership

Education & training

Zewail City of Science, Technology and Innovation
B.Sc. studies in Computer Science, Software Engineering focus · 2024–2028 (expected)

FlyRank AI
AI Fluency · UI/UX Design · Machine Learning · Front-end AI Engineering
